

# Work package 5: communication and outreach

## IDEAAL European project

# Work package 5 deliverables

D5.1

Information tools for industrial companies (submitted in M24)

D5.2

Annual international conference for GANIL users (M36)

D5.3

New website and newsletter for academic users (submitted in M24)

D5.4

Online and printed tools for dissemination of information to the general public (M30 > delayed in December 2019)

D5.5

Press kit (delayed in June 2019)

# Status of task 1 – funders and members

- 

Communication tools to support the search for new funders and sponsors
- 

In progress: design of the template ongoing (Word document)
- 

Promotion of local, national and international scientific and technical joint projects
- 

Transversal action: highlighting of partnerships in documents and news published on websites
- 

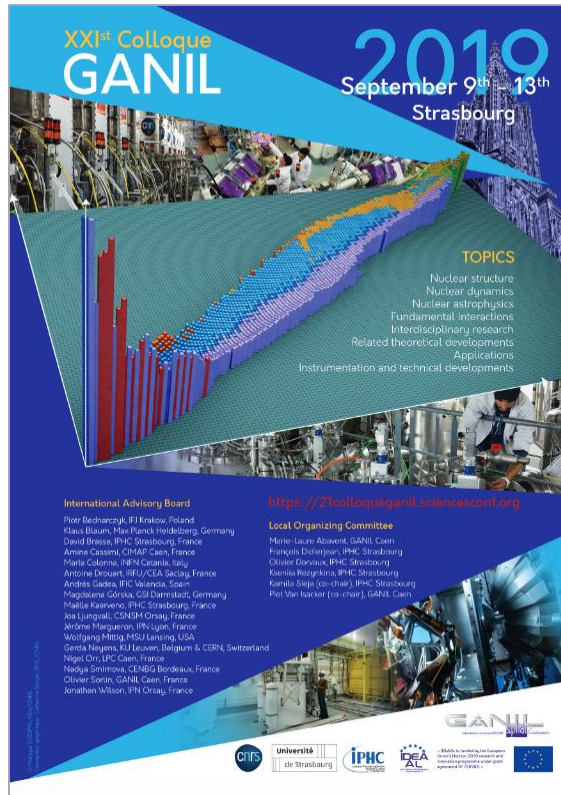

Summary activity report sent to members and funding partners
- 

To be sent in 2019 for the past three years

# Status of task 2 - users

Annual international conferences for the community

EURORIB in May 2018 (Giens, France)  
GANIL community meeting in 2018 (Caen, France)

Next Colloque September 9<sup>th</sup> – 13<sup>th</sup> 2019 (Strasbourg, France), co-organized with IPHC Strasbourg  
-> **submission of abstracts is available online**  
<https://21colloqueganil.sciencesconf.org/>

# Status of task 2 - users

D5.3

New website and newsletter for academic users (submitted in M24)

▶ Newsletter for users

▶ Last newsletter sent in December  
Ongoing: new edition before summer

▶ Upgrade of the GANIL-SP2 users web site

▶ Presentation of the new website by Maxime

# GANIL user website - Results

- Only a few pages were consulted
- It was hard to browse
- Informations were difficult to find
- Pages were not updated
- It was too slow
- The difference between the two websites was confusing
- Too ugly
- Content management was complex

[Call for proposals](#)

[Program Advisory Committee \(PAC\)](#)

**BEAM SCHEDULE**

**PREPARING AN EXPERIMENT** >

**PREPARING YOUR STAY** >

## Call for proposals

The next meeting of the GANIL Program Advisory Committee (PAC) will take place October 17th-18th 2019, at GANIL.

The deadline for submission of the proposals is **May 30<sup>th</sup> 2019 (14:00 CET)**.

The cyclotrons will be running approximately 3 months in one block in 2020. To optimize the operation of the facility, this call for proposals covers experiments **ready to run** around February 1<sup>st</sup> 2020. The only restriction concerns the G1 vault that will host the VAMOS+MUGAST+AGATA setup in 2020. Proposals for experiments in the G1 vault are therefore required to be compatible in order to run as a campaign and coordinated as such, among the spokespersons, contact persons and scientific coordinators, prior to the proposal submission. Other proposals for the G1 vault not included in the above call should be sent as letters of intent so as to be able to help planning future calls.

All proposals for other experimental halls will be considered for this call.

During the 2019 run, new SPIRAL1 beams will be tested ( $^{48}\text{Cr}$ ,  $^{49,50}\text{Sc}$ ,  $^{55}\text{Co}$ ,  $^{56,57}\text{Ni}$ ) and the production yields of Al, P and Cl will be also be checked. Therefore, proposals using these beams are encouraged (the expected production rates are available

## TransNational Access – ENSAR2

GANIL is an Infrastructure supported by the European Community through the ENSAR2 contract in the framework of H2020-INFRAIA-1-2014-2015, for the period from **March 1<sup>st</sup>, 2016 to February 29<sup>th</sup>, 2020**.

This contract enables GANIL to reimburse the travel and living expenses of researchers coming to carry out experiments during this period.

Priority is given to new users and also young researchers.

### Conditions

This contribution can be allocated to scientists if they work in an Institution established in a Member State or Associated State (excluding French Laboratories). To be eligible, the experiment must have a spokesperson or a co-spokesperson from an Institution of a Member or Associated State (excluding those from French laboratories), and the majority of the users must work in a country other than France.

Access for user groups with a majority of users not working in a EU or associated country is limited to 20% of the total amount of units of access provided under the grant.

### Support

### How to apply

### Your arrival at GANIL

### After the experiment
