

WP3/Task 3 : Data Management

- Main Goal : producing a Data Management Plan
 - a DMP describes the life cycle of data :
 - Production, management, exploitation, storage, backup, transfer, sharing, etc.
- Milestones and deliverable
 - MS7 : report on data management strategy (12 months)
 - MS8 : assessment of data storage needs at GANIL (24 months)
 - DS3.4 : Data Management Plan -> 36 months
- Ressources
 - 1,5 person.year+ WP Leader
 - Funding for the organisation of interviews or meetings

WP3/Task 3 : Data Management

- Step 1 : Audit of the data storage and management :
 - questionnaire and interviews to past, present and futur GANIL users
- Step 2 : Analyse of the answers in regard to :
 - the current capacity of the storage infrastucture and its evolution capabilities
 - the current organisation of datas
- Step 3 : Scenarios about data storage, exploitation and management for the short and long term including
 - costs, data storage, data description, data transfert, re-use, sustainability, security, accessibility, backup, open-data, etc...
- Best scenario selection for the DMP elaboration

WP3/Task 3 : Data Management

- Questionnaire sent to GANIL physicists in April 2017
 - 7 answers -> needs to be sent again
 - Will be send to GANIL users in the begining of 2018
- Recruitment of the fixed-term contract
 - Recruiitee has started on 2nd November
