

WP4 Meeting

- Status of WP4 Tasks : Task 1 (MH.Moscatello), Task2 (N.Renard), Task 3 (A.Leservot)
- Discussion and decision of distribution of actions concerning Industrials, between Tasks 1, 2, 3
- Schedule of WP4 Tasks (H.Cagnard)
- Communication (WP5 – M.Grar)
- AOB

Task1

Access provision for research teams from
industries and involvement of industrial users
(GANIL)

Task1 main goals

- Convince the industries of the interest of the new accelerator SPIRAL2, for their measurements and applications, and attract more industries for new applications through the use of the GANIL accelerators
- Financement of 240 hours of beam time (and travel expenses) for some new industrial experiments that would like to test the capabilities of the GANIL facility in order to confirm industrial's interest in the available beams
- Creation of an international selection panel to assess the proposed experiments

Task 1 deliverables, budget and human resources

D4.1 Business plan for the industrial application activities at GANIL (M36)

Partner	Budget (Euros)	Human Ressources Person.Month
GANIL	258 k€*	4

258k€: 240 beam hours and travel-lodging expenses for 15 teams of 3 persons each (2 beam Uts for each experiment)

- Creation of the international selection panel: 1 person of the CEA/DAM (contact Xavier), 1 or 2 persons from the RADSAGA project (MHM contacts them in April), 1 person from CIMAP laboratory (contact MHM) ~~JUNE 2017~~ -> OCTOBER 2017 (discussion with GANIL Direction in July and contacts with potential members from July to October)
- Communication on the IDEEAL offer: 240 beam hours and associated travel expenses => with WP5 communication **END OF 2017**
- -> already some oral and unofficial announcements in various meetings with industrials -> the industrials are very interested by this offer
- Meeting with GANIL Direction on GANIL beam schedule for IDEEAL before communication towards GANIL industrial users **JULY 2017?**
- Participation to RADECS Conference from 2 to 6 October in Geneve -> GANIL will have an exhibition booth: Presentation of IDEEAL offer
- Possibility of financement for 1 experiment in Autumn at GANIL facility: discussion in progress with a start-up from Rennes
- **Task 1 schedule:** see Hadrien's presentation

- Task1:

- contacts with industries for use of the beams for new experiments (industrial developments, new ideas for applications)
- Discussions with industries on the possibilities to increase their involvement in GANIL organisation

- Task 2:

- Identify new application domains with the GANIL and SPIRAL2 facilities (market research)
- Identify new industrial customers for the use of GANIL and SPIRAL2 beams
- Identify industrials interested by the transfert of know-how from GANIL part
- Promotion actions towards industrials (in collaboration with WP5): B2B meetings, exhibitions, etc....

- Task 3:

- Contacts with industries for new applications with GANIL and SPIRAL2 facilities (might lead to modification of the facilities)

It's may be interesting to divide subjects for new applications between Task 2 and 3 in function of their respective competence domains – to be discussed
